RHEUMATOLOGY COURSE

40% of patients coming to an orthopaedic surgeon's clinic, come with joint pains. Same is the story with rheumatologists, pain physicians, and neurophysicians.

Rheumatology is a less understood subject, DMARDs are toxic medicines with many side effects and an average clinician is afraid to prescribe them!

Orthopaedic surgeons who have seen the insides of innumerable joints lack the knowledge of appropriate medical management, and rheumatologists who have treated countless patients have seldom seen the inside of a joint!

A comprehensive course covering all aspects of rheumatology is the need of the day and after receiving numerous requests, a special course has been designed.
